

# 「AGRAR」NEWS

An information about Schneider agricultural devices

## Important connections:

### Spring Saddles & Rocker Arms

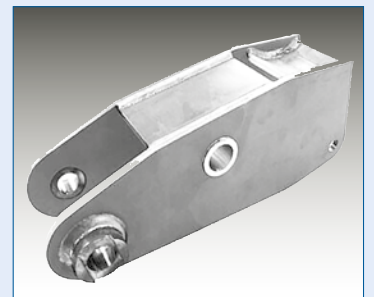

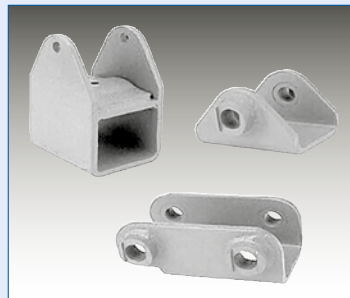

Agricultural trailers typically use robust, low-maintenance leaf springs, such as trapezoidal, parabolic or boogie springs, for shock absorption. These springs work by bending and dampening through friction between the layers.

### Spring Saddles and Rocker Arms

from Schneider:

- > for single and tandem axles
- > in **generously dimensioned** material thicknesses
- > **diverse geometries** for your application
- > for common spring widths and spring bolt diameters

**Please contact us to discuss your project!**

**We supply leaf springs, rubber rollers, spring bolts and complete spring units.  
More information can be found on our website: [www.schneider-fc.com](http://www.schneider-fc.com).**
