

An information about Schneider agricultural devices

Pallet Forks / Pallet Fork Handler: The alternative!

The robust **pallet fork handler** from **Schneider** makes it easy to load and unload bulky, palletised goods or goods packed in big bags with the front loader!

Often replaces a forklift truck

- > as a **replacement** for additional **forklift truck**
- > available with **Euro brackets**, alternatively connections for Weidemann or Schäffer yard-/telehandlers
- > **forged forks** made from high-strength steel
- > other pallet forks or devices such as a gripper arm (see below) can be attached

Versatile

- > **pallet fork carrier** can accommodate heavy-duty spikes on the lower crossbar; then serves as a **2 or 4 bale spike**
- > with support arms can be used as **big bag - carrier** for transport bags 900 x 900 mm and 1,000 x 1,000 mm
- > can be used with **gripper for thin logs**

Practical, easy to use

- > the fork positions can be easily adjusted using the **quick-release fastener** on the **FEM2A mount**
- > can also be used for the **rear hydraulics** using an adapter
