

AGRAR NEWS

An information about Schneider agricultural devices

Axle units: For the grounds!

Schneider spring assemblies are ideal for agricultural, landscaping and civil engineering trailers. With the modular system, you can obtain **single or tandem assemblies** tailored precisely to your specifications.

Variety

- > **Units with conventional springs:**
extremely resilient,
very suitable for off-road use (*large axle compensation travel*),
particularly reliable
- > **Units with parabolic springs:**
driving comfort (*progressive spring characteristic curve*),
low weight (*fewer spring layers*),
robust technology
- > **For servicing / custom designs:**
springs, spring saddles and rocker arms, spring bolts
and rubber rollers are also available individually

Tailored precisely to your requirements

- > **More long-term certainty:**
units, springs and accessories are available for decades
and **can usually be delivered at short notice**
- > Customised products
are possible for certain batch sizes.
