Bale Spikes: Simple effective!

By **simply spearing** them onto sturdy bale fork tines, hay and straw bales can be **stacked, loaded, and transported quickly and safely**. Despite the availability of modern alternatives, their simple and robust design makes them the most efficient and cost-effective solution for handling unwrapped bales on many farms.

For a variety of needs

- > **double or quadruple bale forks**
- > **sturdy, low-maintenance and durable**
- > suitable for **Euro-mount front loaders** as well as **3-point linkage systems** (front or rear)
- > **thick-walled bale tube** featuring **integrated conical sleeves** (M22 × 1.5 thread)
- > **heavy-duty bale tines** manufactured from **high-strength spring steel. Made in Germany**

Practical, efficient solutions

Art.-No.	Frame size in mm	Number of tines	Load capacity in kg
125.030.000	1.080 × 500	2	1.000
125.030.300	1.080 × 550	2	1.000
125.030.500	1.080 × 500	4	1.500

- > **folding bale fork** (125.030.300) **for safe transport on public roads**
- > **available with short lead times**
- > **tines available individually as replacement part**
