

An information about Schneider agricultural devices

LP Brackets: Greater flexibility!

The Schneider **LP** (perforated plate) **brackets** enable the flexible use of attachments such as bale grippers, volume buckets, multipurpose buckets, and silage grab buckets on front loaders, wheel loaders, and telescopic handlers. **LP-mini brackets** fit a wide range of farm loaders.

System Advantages

- > the connection is as strong and **torsion-resistant** as an integrated component of the device
- > no complicated welding, **simply screwed**
- > enables **fast and easy adaptation** of existing devices to **different carrier vehicles**.

Fast service for your customers

- > a wide range of LP brackets is **available from stock**
- > short lead times for standard devices
- > fewer bracket variants mean **shorter delivery times**, helping you serve your customers faster

Future-proof investment

- > in economically challenging times, the ability to continue using existing devices is a valuable advantage
- > to switch to a different carrier vehicle, **simply replace the brackets on the existing devices**
