Bale Spike Support for Pallet Forks:

Quick Conversion

Sockets on the underside of our pallet fork carrier frames allow heavy-duty spikes to be fitted directly, converting the fork into a robust bale spike. As an alternative, **the spikes can be fitted in spike supports suitable for all carrier frames with FEM mounting.**

System Advantages

- **no need for a complete bale spike assembly**
- particularly **quick to change**, as there is no need to screw the spikes into the carrier frame every time
- **for all carrier frames with an FEM mount,** regardless of year of manufacture or manufacturer
- **sturdy construction** thanks to high-quality materials
- space-saving storage when not in use
- **available at short notice**
- suitable for occasional use

Bale Spike Supports and Spikes

Art-No.	Available versions	Weight
125.023.400	Spike Support M 28 for quick change	10.0 kg
