Rapid information for our customer

Delivery of kits:

Reusable is the way to go!

Our kits are delivered on **disposable wooden or steel racks**. In order to reduce packaging waste and your disposal costs, **we are gradually switching to reusable racks**.

These improve your operational processes

- > **No disposal necessary:** racks are collected free of charge within three months
- > **Space-saving:** collapsible and stackable racks reduce storage requirements
- > **More stable:** new racks increase transport safety, especially during unloading
- > **Cleaner:** hot-dip galvanising prevents corrosion – unlike disposable steel racks

and are sustainable

- > A **longer service life** means that fewer materials and energy are used to produce the kits.
- > You **save energy and time**, because there is no need to dismantle and dispose of the transport racks.
- > **Your carbon footprint is reduced** during the manufacture of box bodies, which is beneficial for the environment.

CAUTION: Once installation is complete, please assemble the racks and ensure they are ready for collection. Unfortunately, we must charge for any racks that are not returned in order to safeguard the reusable system.
