

Spare Wheel Lifting Jacks: Always carry a spare!

Schneider offers robust spare wheel lifting jacks for the **space-saving installation of spare wheels** beneath the vehicle chassis. Delivering a **pulling force of 250 kg**, they are suitable for the majority of trucks and trailers with a gross vehicle weight of more than 3.5 tonnes.

Precise and Robust

- > **smooth-running winch** for easy one-person spare wheel changes
- > with a self-locking, splash-proof **worm gear**
- > for plastic and steel cables (Ø 6 mm)
- > the winches comply with relevant safety regulations and **offer robust, low-maintenance performance**
- > powder-coated for effective **corrosion protection** (standard colour: RAL 9005, black)

Available in two versions:

- > Model 300.180.103 with folding handle for a compact profile
- > Model 300.180.005 for removable hand crank

Removable crank handles:

- > Standard, 170 mm: 300.180.101
- > Extended, 575 mm: 300.180.202
